# What if every street had trees?

Imagine a climate resilient Lexington.

Urban trees help fight climate change. They...

- Take in CO2
- Intercept stormwater
- Provide shade
- Reduce energy usage
- Improve mental health.

What if we all joined the climate conversation?

Imagine a climate resilient Lexington.

We can imagine a better future together.

What if we could name 5 native trees?
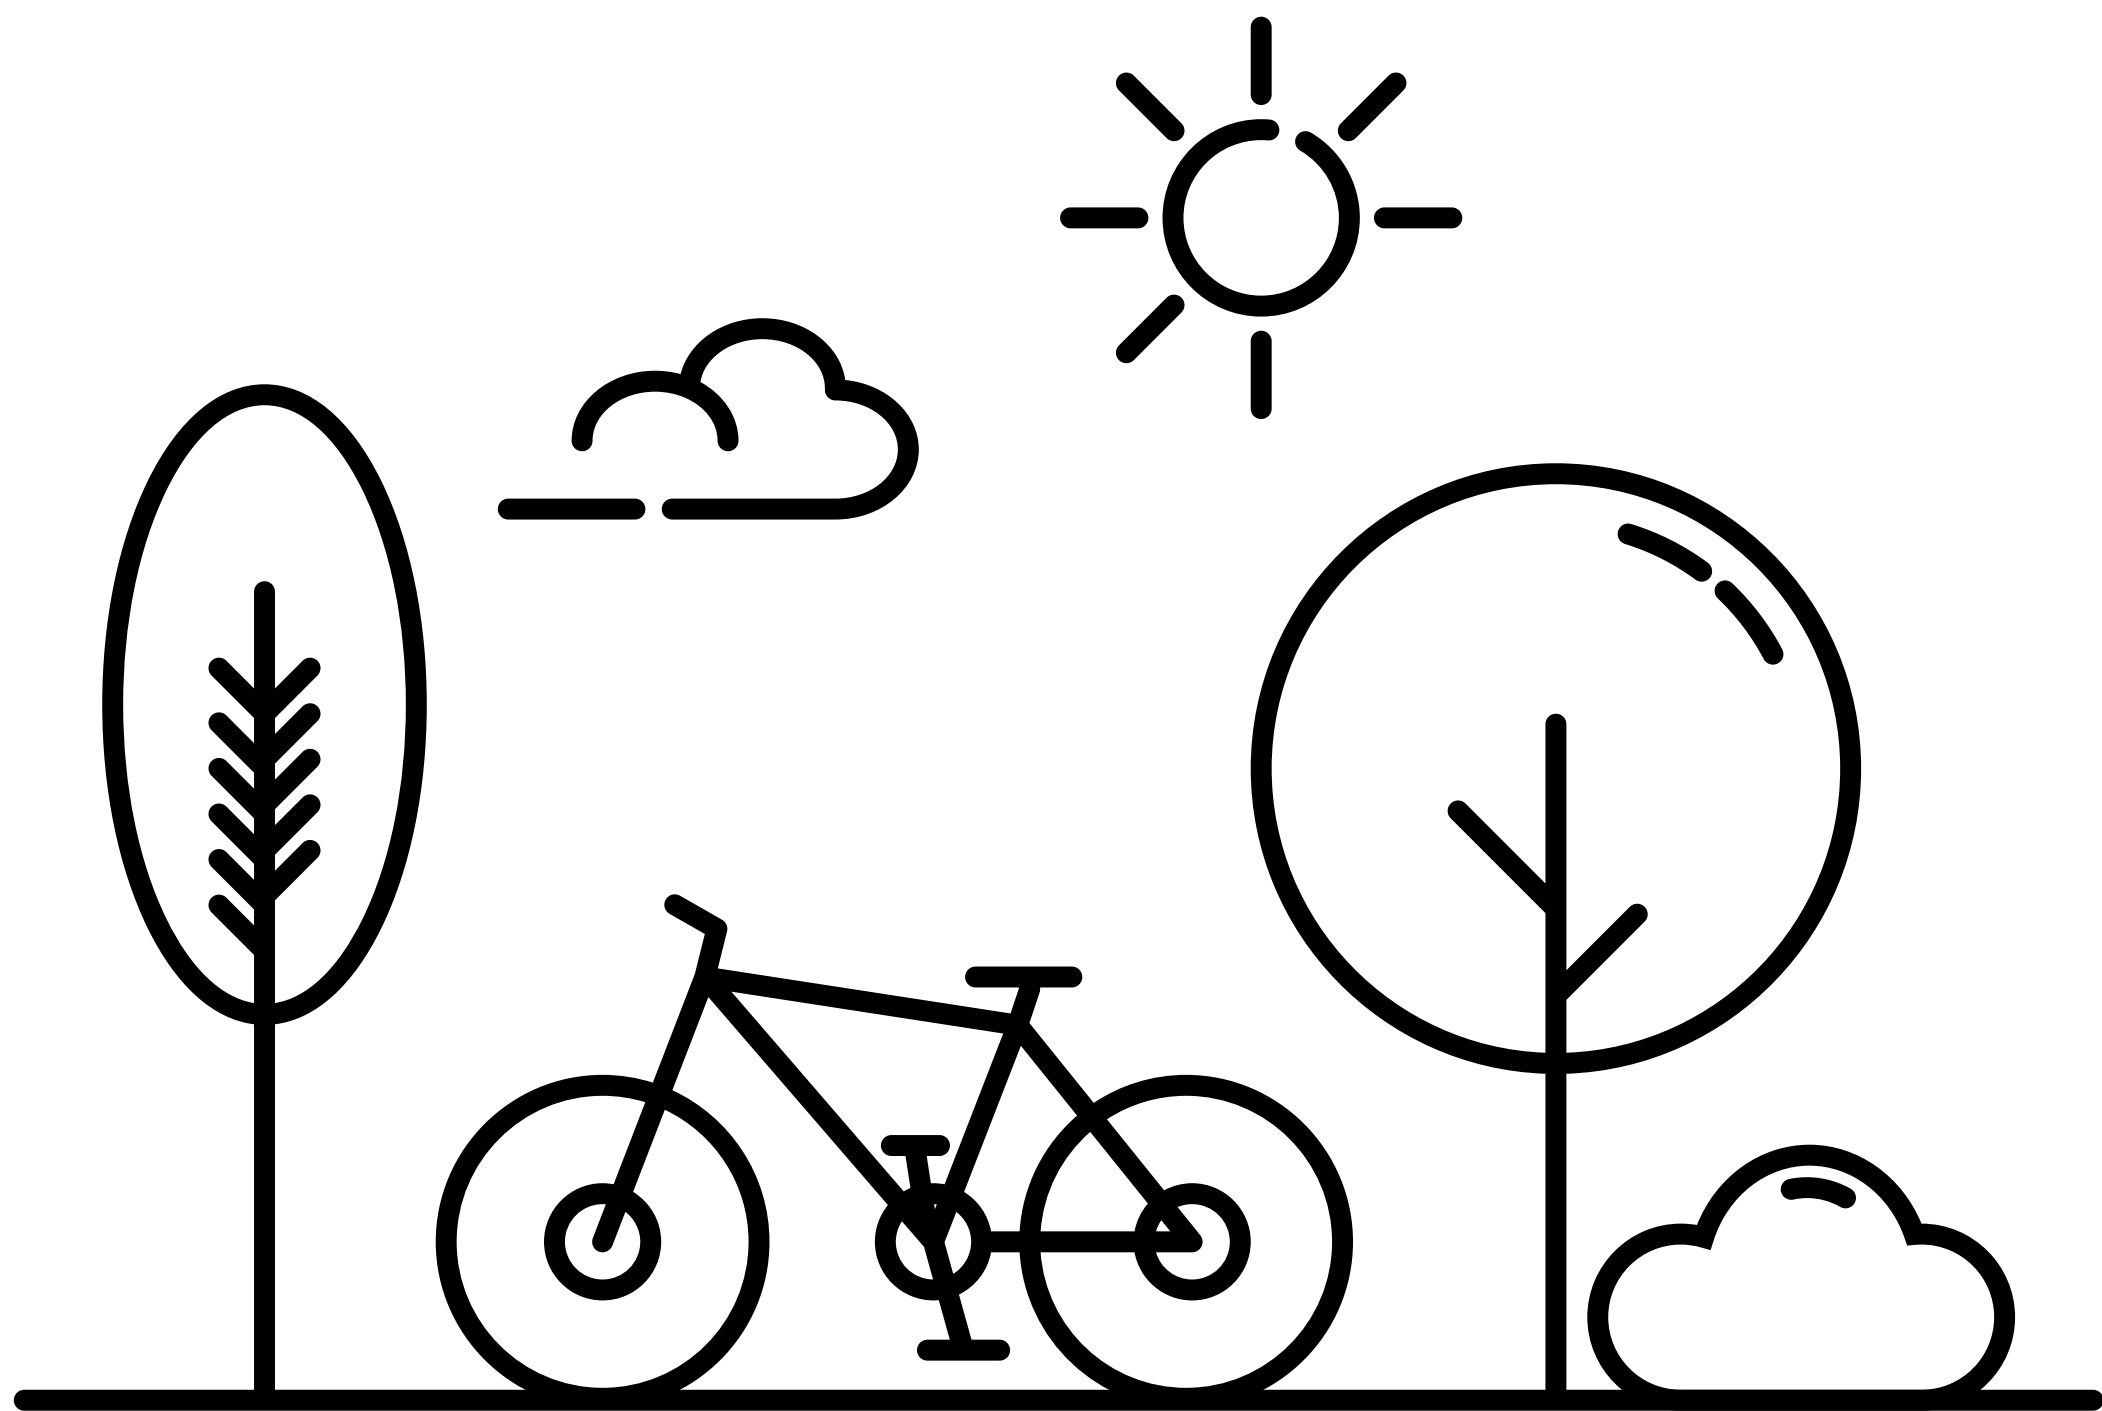

Imagine a climate resilient Lexington.

The average American can name over 100 corporate logos and only 10 plants.
- Robin Wall Kimmerer

You can change that.

What if we drove less?

Imagine a climate resilient Lexington.

1/3 of the world's gas emissions are because of vehicles. Let's work together to make Lexington better for biking, walking, and public transit.

What if we cared for trees like they care for us?

Imagine a climate resilient Lexington.

Trees are more likely to survive when they are properly mulched and pruned.

Join the #ClimateConversation

What if we supported our local farmers?

Imagine a climate resilient Lexington.

Local food builds community, reduces resource consumption, and preserves our natural lands.

Join the #ClimateConversation

What if we all planted a tree today?

Imagine a climate resilient Lexington.

You can help maintain and build a more equitable tree canopy.

What if we had more community gardens?

Imagine a climate resilient Lexington.

Community gardens...
- Increase fresh foods
- Support food security
- Improve mental health
- Provide educational opportunities for the community.

What if our yards were pollinator habitats?

Imagine a climate resilient Lexington.

Let's create pollinator friendly habitats to support local food and flowering plants.

What if we took care of our soil?

Imagine a climate resilient Lexington.

Soils provide plants with essential minerals and nutrients for them to grow.
